Computer abbreviations quiz pdf. Computer abbreviations quiz with answers.

Additional InformationPNG (Portable Network Graphics) PNG is a format for storing bit-mapped or raster images on the computer. Since 1985, the Domain Name Scheme has been a core component of the functionality of the Internet by offering an internationally dispersed directory infrastructure. Its routing function enables internetworking and essentially establishes the Internet. HTTPS: Hypertext Transfer Protocol Secure. It uses the less compression technique to save images like GIF files but without copyright issues. CSV: It stands for Comma Separated Values (CSV). Tertiary storage devices comprise high-capacity data archives designed to include vast numbers of removable media, such as tapes or optical discs. Contain up to 10 transistors in Small Scale Integration or (SSI). It was developed in the early 1990s by Adobe Systems. The amount of transparency can be controlled. They are of various types which include the standard USB, Mini USB, and Micro USB, have two or more variations of connectors. The full form of 'CC', a field of E-mail header is a Carbon copy. The format supports interlacing, and it can be developed faster than the GIF format. India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,47,18,937+ Students Object Linking and Embedding The correct answer is Object Linking and Embedding The correct answer is Object Linking and Embedding Additional Information Other shortcuts keys for MS-Excel Shortcut Function Alt + F File menu options in the current program. SSH: Secure Shell. Bcc stands for blind carbon copy. SMTP was first defined in 1982. The ENIAC's field of the application included weather prediction, atomic-energy calculations, cosmic-ray studies, thermal ignition, random-number studies, wind-tunnel design, and other scientific uses. India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,47,18,937+ Students Domain Name SystemData Net ServiceData Net SystemDomain Name Setup Option 1 : Domain Name System The correct answer is the Domain Name SystemDNS). IBM International Business Machine. It contains a bitmap of indexed color so it is also called a bit-mapped image. USB connectors come in different shapes and sizes, between 100 and 1,000 transistors in Large Scale Integration or (LSI). JPG is the file extension for JPEG files (Joint Photographic Experts Group). PNG provides low-resolution images that look good and load quickly. It is a connection-oriented, text-based protocol. Key Points The meaning of Cc is that those address appears after the Cc: header would receive a copy of the message and the Cc header would also appear inside the header of the received message. Key Points Object Linking and Embedding is a Microsoft Technology that facilitates the sharing of application data and objects written in different formats from multiple sources. BCC should be used when sending out marketing emails, newsletters, or other unsolicited emails. India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,47,18,937+ Students Electronic Numerical Integrator and ComputerElectronic Numerals Integration and ComputingElectronic Numbers Integration and ComputerElectronic Numerical Integrator and Computer The correct answer is Electronic Numerical Integrator and Computer. DBMS Database Management System. PPP: Point to Point Protocol. Random-access memory (RAM) and cache are both examples of a primary storage device. JPEG Joint Photographic Experts Group. Key Points URL stands for Uniform Resource Locator. To execute the 'Cut' function in MS Excel, Ctrl + X keyboard shortcut key combination is used. After that, the data is permanent and can be read any number of times. Additional Information Another term of Worm (termed as 'malware') A computer worm is a malicious virus, that is a self-replicating software program that affects the functions of hardware and software programs. The ENIAC weighed 30 tons, used 200 kilowatts of electric power and consisted of 18,000 vacuum tubes, 1,500 relays, and hundreds of thousands of resistors, capacitors, and inductors. Other two types of ROM are Electrically Erasable Programmable ROM (EEPROM) Erasable Programmable ROM (EPROM) Additional Information Primary memory can be divided into RAM (Random Access Memory) and ROM (Read Only Memory) RAM ROM It is a Volatile or temporary memory It is Non Volatile or permanent memory Data gets erased when the power supply is off Data stored permanently Faster memory Slow memory It is used in the normal operations of a computer after starting up and loading the operating system A ROM chip is used primarily in the start-up process of a computer India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,47,18,937+ Students Common Basic Operating LanguageComputer Basic Oriented LanguageComputer Based Operating LanguageCommon Business Oriented Language Option 4 : Common Business Oriented Language The correct answer is Common Business Oriented Language. COBOL stands for Common Business Oriented Language. IMAP4 Internet Message Access Protocol. Key Points The full form of USB is Universal Serial Bus. It associates separate details with domain names assigned to each of the participating organisations. Alt + E Edits options in the current program. Each valid URL points to a unique resource. Such resources can be an HTML page, a CSS document, an image, etc. India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,47,18,937+ Students The correct answer is JPEG. Communication between mail servers generally uses the standard TCP port 25 designated for SMTP. PNG is also known as a successor of GIF format images. India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,47,18,937+ Students Continuous copyCarbon copyCharacter copyControl copy The correct answer is a Carbon copy. India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,47,18,937+ Students Simple Message Transfer ProcessSimple Message Together ProtocolSimple Mail Transfer Protocol Option 4 : Simple Mail Transfer Protocol The correct answer is option 4 i.e Simple Mail Transfer Protocol. Key Points LAN stands for Local area Network is a data communication network connecting various terminals or computers within a limited geographical area or building. Ethernet is a LAN technology. Images can be saved by using true color. Object Linking and Embedding allows users to edit and create documents that contain objects created by different applications. India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,47,18,937+ Students Switch mode Transfer ProgrammingSwitch mode Transfer ProtocolSimple Mail Transfer Protocol Simple Main Transfer Protocol Option 3 : Simple Mail Transfer Protocol The correct answer is Simple Mail Transfer Protocol. more than 1 million transistors in Ultra-Large Scale Integration or (ULSI). It is primarily designed for use in business-oriented applications. Most notably, it converts more conveniently memorised domain names into the numerical IP addresses required to find and recognise web networks and devices with underlying network protocols. Portable Network Graphics is the full form of PNG in the computer image format. Ethernet is very popular because it is easy to understand, implement, maintain and of low cost. The Domain Name System assigns responsibility for assigning and mapping domain names to Internet providers by designating authoritative domain name servers for each domain. Each message consists of a header and four sections: a question, a reply, an authority and an additional space. It is a non-volatile memory, that is, information stored in such a memory is permanent and cannot be changed. RAW-Raw Image Formats AI - Adobe Illustrator Document. USB Pendrive is a Secondary type of storage device. The ENIAC used 20 single-number accumulators as primary functional units. It is first developed in 1960 by the CODASYL Committee (Conference on Data Systems Languages), between 1,000 and 10,000 transistors in Very-Large Scale Integration or (VLSI). India's #1 Learning Platform Start Complete

Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,47,18,937+ Students

correct answer is Super Large scale Integration. India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,47,18,937+ Students Undistributed Resource LocatorUniform Resource LocatorUnified Resource LocatorUniform Region Locator Option 2 : Uniform Resource Locator The correct answer is Uniform Resource Locator. POP stands for Post Office Protocol. Ctrl + A Selects all text Ctrl + X Cuts the selected item Ctrl + Del Cut selected item Ctrl + C Copy the selected item Ctrl + Ins Copy the selected item India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,47,18,937+ Students The correct answer is LAN. Key Points The Internet Protocol (IP) is the principal communications protocol in the Internet protocol suite for relaying datagrams across network boundaries. Key Points SMTP stands for Simple Mail Transfer Protocol. The Internet Protocol part of the standard refers to the addressing of data message packets. Important Points The third generation (1966-75) of computers introduced Integrated Circuits and replaced transistors. Instead, IMAP will be used for receiving messages. In the Computer field, OLE is the abbreviation of Object Linking and Embedding. PNG form was created by a team working under Thomas Boutell. Key Points Ctrl+X is a keyboard shortcut that is used to cut a selected section of the text, image, or another object. PDF provides an easy and secure approach for data transmission and sharing through emails and other sources. Since IMAP deals with message retrieval, you will not be able to use the IMAP protocol to send emails. between 10, 000 and 100,000 transistors in Super-Large Scale Integration or (SLSI). The data transmission between the client device and access point routers using radio waves. The first all-electric computing machine was proposed by physicist John Mauchly in 1942 and was completed in 1945. Read only memory (ROM) is a type of memory that is used in electronics and computers. JPEG is the extension name for an image file. Key Points The full form of PDF is Portable Document Format. Examples are microprocessor chips, micro-controllers, basic PICs, and calculators. PNG has a file extension ".png". Using a process called "store and forward," SMTP moves your email on and across networks. PrimarySecondaryTertiaryNone of the above The correct answer is Secondary. The standard network protocol of the Internet, TCP/IP, stands for Transmission Control Protocol/Internet Protocol. BSP- It stands for "Binary Space Partitioning". It is used to store data in a tabular format. A URL is nothing more than the address of a given unique resource on the Web. TELNET. Additional Information Some important Abbreviations Abbreviation Stands for ASCII American Standard Code for Information Interchange. India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,47,18,937+ Students Printable New GraphicPrintable New GraphicalPort Natural GraphicsPortable Network Graphics Option 4 : Portable Network Graphics The correct answer is Portable Network Graphics. These are map files that are used by the games developed with Quake software. PDF - Portable Document Format. Key Points ENIAC stands for Electronic Numerical Integrator And Computer. Examples of URLs: India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,47,18,937+ Students Write Once, Read ManyWord On, RAM MemoryWord Optical, Recognition MalwareWireless Operating, Read Module Option 1 : Write Once, Read Many The correct answer is Write Once, Read Many When used in all capital letters, WORM is an acronym for write once, read many, an optical disk technology that allows you to write data onto a disk just once. Additional protocols that operate within the TCP/IP framework include UDP, HTTP, and FTP. EBCDIC Extended Binary Coded Decimal Interchange Code. Important Points It is the program a personal computer's microprocessor uses to get the computer system started after you turn it on. Usenet Protocol. Linking establishes a connection between two objects. COBOL Common Business Oriented Language. Key Points The Domain Name System (DNS): It is a hierarchical and decentralised naming system for devices, utilities, or other resources linked to the Internet or a private network. The first commercial release of the Universal Serial Bus (version 1.0) was in January 1996. SVG - Scalable Vector Graphics PSD - Photoshop Document. It works closely with something called the Mail Transfer Agent (MTA) to send your communication to the right computer and email inbox. JPG: JPG is the most widely used image file format. The email addresses viewable only by the sender. Embedding facilitates data insertion. SMTP is an internet protocol that helps to send emails. F1 Universal help (for any sort of program). The main reason behind its development was the limitation of 256 colors only in GIF. India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,47,18,937+ Students Primary read-only memoryProgrammable read-only memoryProgram read-output memoryProgram read-only memory Option 2 : Programmable read-only memory The correct answer is Programmable read-only memory Key Points PROM stands for Programmable Read Only Memory. India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,47,18,937+ Students The correct answer is JPG. Key Points JPG means a joint photographic group and it is a format used for saving images. It is an image format that compresses images and the format is most popular for sharing photos and other images over the internet or between mobile and PC. There are two components of a video file that is a container and a codec. The video format is the container that stores audio-video subtitles and any other metadata. A codec encodes and decodes the multimedia data such as audio or video. There are 8 common video formats data MP4, MOV, WMV, FLV, AVI, AVCHD, WebM, and MKV. POP3: Post Office Protocol. Additional Information Some of the commonly used protocols are: FTP: File Transfer Protocol. HTTP HyperText Transfer Protocol. Important Points JPEG (or JPG) - Joint Photographic Experts Group. Important Points IMAP (Internet Message Access Protocol) is an email protocol that deals with managing and retrieving email messages from the receiving server. A router connects the other devices of a LAN network. A single device can perform operations of computations. TCP: Transmission Control Protocol. BIOS Basic Input Output System. India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,47,18,937+ Students Basic Investment/Output systemBasic In/ out systemBasic Input/Output systemBasic Input/ Output Station Option 3 : Basic Input/Output system The correct answer is the Basic input/output system. HTTP: HyperText Transfer Protocol. India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,47,18,937+ Students Paint Document FormatPrint Document FilePortable Document FormatPrint Document Format Option 3 : Portable Document Format The correct option is the Portable Document Format. It is also used for emailing individual or multiple contacts. They are typically used to distribute read-only documents that preserve the layout of a page. Wi-Fi is a wireless network protocol of Local Area Network technology. Additional Information MAN stands for Metropolitan Area network is used to connect computer resources in a geographical area such as a Metropolitan area. WAN stands for Wide area network is used to connect the computers of a very large geographical area. Key Points Simple Mail Transfer Protocol: An SMTP (Simple Mail Transfer Protocol) server is an application that's primary purpose is to send, receive, and/or relay outgoing mail between email senders and receivers. BMP - BitMaP. And the number three stands for "version 3," which is the latest version and the most widely used — hence the term "POP3." India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,47,18,937+ Students Ctrl + XCtrl + CAIt + CCtrl + Z The correct answer is Ctrl + X. The DNS protocol uses two types of DNS messages, queries and responses, all of which have the same format. It can also be saved by using palette and grayscale formats provided by GIF. The correct answer is TCP/IP. USB is a plug and play interface that allows a computer to communicate with external and other devices. TIFF - Tagged Image File Format. between 10 and 100 transistors in Medium Scale Integration or (MSI). PNG format also supports Gamma correction. Portable Network Graphics Format was developed in early 1995. GIF - Graphics Interchange Format. India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,47,18,937+ Students SMTP is part of the application layer of the TCP/IP protocol. EPS - Encapsulated Postscript. In this header, the email addresses viewable by all. Object Linking and Embedding allows an editing application to export part of a document to another editing application and then import it with additional content. Additional Information A primary storage device is a storage medium that holds a memory for short periods of time while a computer is running. Cc is used for emailing individual or multiple contacts. It is considered to be the first operational electronic digital computer in the United States, developed by Army Ordnance to compute World War II ballistic firing tables. Bcc is similar to that of Cc besides that the Email address of the recipients specified in the Bcc field does not appear in the received message header and the recipients in the To or Cc fields will not know that a copy sent to these address.
